## 1、Description

|      |   |     |   |             |   |   |   |              |   |   |   |      |   |   |   |
|------|---|-----|---|-------------|---|---|---|--------------|---|---|---|------|---|---|---|
| H    | S | M   | D | 2           | 9 | 2 | 0 | —            | 6 | 0 | 0 | —    | 1 | 6 | V |
| Logo |   | SMD |   | 2920 Series |   |   |   | Hold Current |   |   |   | Vmax |   |   |   |

### Solderability:

Meets EIA specification RS186-9E and ANSI/J-STD-002 Category 3

| A    |      | B    |      | C    |      | D    |      | E    | Marking |
|------|------|------|------|------|------|------|------|------|---------|
| MIN  | MAX  | MIN  | MAX  | MIN  | MAX  | MIN  | MAX  | MIN  |         |
| 6.73 | 7.98 | 4.80 | 5.44 | 0.45 | 1.60 | 0.30 | 2.50 | 0.25 | D600    |

## 2、Electrical performance

| Part Number  | Vmax | I <sub>max</sub> | I <sub>hold</sub> | I <sub>trip</sub> | P <sub>dmax</sub> | Max Time T <sub>irp</sub> |      | Resistance       |                   |
|--------------|------|------------------|-------------------|-------------------|-------------------|---------------------------|------|------------------|-------------------|
|              | (V)  | (A)              | (A)               | (A)               | (W)               | (A)                       | (s)  | R <sub>min</sub> | R <sub>1max</sub> |
|              |      |                  |                   |                   |                   |                           |      | (Ω)              | (Ω)               |
| HSMD2920-600 | 16   | 40               | 6.00              | 12.0              | 2.00              | 30.0                      | 2.00 | 0.003            | 0.020             |

**I<sub>h</sub>:** Maximum operating current of the HPTC at an ambient temperature of 25°C

**I<sub>t</sub>:** The HPTC initiated the minimum current for protection at an ambient temperature of 25°C

**V<sub>max</sub>:** Maximum operating voltage of the HPTC

**I<sub>max</sub>:** Maximum current that the HPTC can withstand

**R<sub>min</sub>:** Minimum resistance at 25°C of stationary air

**R<sub>1max</sub>:** Maximum resistance of product

## 3、Table of Operating Current with Temperature (A) (for reference only)

| Model        | Ambient Operating Temperature |       |      |      |      |      |      |      |      |
|--------------|-------------------------------|-------|------|------|------|------|------|------|------|
|              | -40°C                         | -20°C | 0°C  | 25°C | 40°C | 50°C | 60°C | 70°C | 85°C |
| HSMD2920-600 | 8.50                          | 7.80  | 7.00 | 6.00 | 5.25 | 4.85 | 4.45 | 4.00 | 3.40 |

#### 4、 Test Procedures And Requirements

| test                         | Test Condition                                                   | Accept/Reject Criteria               |
|------------------------------|------------------------------------------------------------------|--------------------------------------|
| Resistance                   | In still air @ 25°C                                              | $R_{min} \leq R \leq R_{max}$        |
| Time to Trip                 | Specified current, $V_{max}$ , 25°C                              | $T \leq \text{maximum Time to Trip}$ |
| Trip Cycle Life              | $V_{max}$ , $I_{max}$ , 100cycles                                | No arcing or burning                 |
| Trip Endurance               | $V_{max}$ , 1 hours                                              | No arcing or burning                 |
| Terminal materials :         | Tin-Plated Nickle-copper                                         |                                      |
| Soldering zone               | Meets EIA specification RS 186-9E and ANSI/J-STD-002 Category 3. |                                      |
| Environmental Specifications |                                                                  |                                      |
| Passive aging                | 85°C, 1000hours                                                  | $\pm 10\%$                           |
| Humidity aging               | 85°C/85%RH. 1000 hours                                           | $\pm 5\%$                            |
| Thermal shock                | MIL-STD-202, Method 107G +85°C/-40°C, 20times                    | -30% typical resistance change       |
| Solvent Resistance           | MIL-STD-202, Method 215                                          | No change                            |
| Vibration                    | ML-STD-883C, Test Condition A                                    | No chage                             |

#### 5、 Soldering parameters

| Profile Feature                                      |                                  |                   |
|------------------------------------------------------|----------------------------------|-------------------|
| Average Ramp-Up Rate ( $T_{s(max)}$ to $T_P$ )       |                                  | 3°C/second max    |
| Pre Heat:                                            | Temperature Min ( $T_{s(min)}$ ) | 150°C             |
|                                                      | Temperature Max ( $T_{s(max)}$ ) | 200°C             |
|                                                      | Time (Min to Max) ( $t_s$ )      | 60 – 180 secs     |
| Time Maintained Above:                               | Temperature ( $T_L$ )            | 217°C             |
|                                                      | Temperature ( $t_L$ )            | 60 – 150 seconds  |
| Peak / Classification Temperature ( $T_P$ )          |                                  | 260 $^{+0/-5}$ °C |
| Time within 5°C of actual peak Temperature ( $t_p$ ) |                                  | 20 – 40 seconds   |
| Ramp-down Rate                                       |                                  | 6°C/second max    |
| Time 25°C to peak Temperature ( $T_P$ )              |                                  | 8 minutes Max.    |

- ◆ All temperature refer to topside of the package, measured on the package body surface
- ◆ If reflow temperature exceeds the recommended profile, devices may not meet the performance requirements
- ◆ Recommended reflow methods: IR, vapor phase oven, hot air oven, N2 environment for lead
- ◆ Recommended maximum paste thickness is 0.25mm (0.010inch)
- ◆ Devices can be cleaned using standard industry methods and solvents

## 6、 Package Information

### storage condition:

**Storage conditions: 30° C max, 60% R.H.Devices may not meet specified performance if storage conditions are exceeded.**

|         |               |
|---------|---------------|
| W       | 16.00±0.30    |
| F       | 7.50±0.10     |
| E1      | 1.75±0.10     |
| D0      | 1.55±0.05     |

## 7、 WARNING

- 1、 Use PPTC exceed by the maximum rating and improper use may result in device damage and possible electrical arcing and flame.
- 2、 PPTC are designed for protection against over current or temperature fault conditions and should not be used when repeated fault conditions or prolonged trip events are anticipated.
- 3、 Device performance can be impacted negatively if devices are handled in a manner inconsistent with recommended electronic, thermal, and mechanical procedures for electronic components.
- 4、 Use PPTC with a large inductance in circuit will generate a circuit voltage above the rated voltage of the PPTC.
- 5、 Avoid impact PPTC device its thermal expansion like placed under pressure or installed in limited space.
- 6、 If any quality problems caused by improper use mentioned above,our company is not responsible.
